## PROFESSIONAL SUMMARY

I'm a strongly motivated person who is looking to start a career in IT industry as programming is my passion. I'm open for new things and I'm strongly believe that this is a thing what I want to do in my life. My strong side is Java, Spring, Maven, Android and SQL as you can see below. I have non-commercial experience working in mini projects, as you can see in my portfolio, what I need is just keep practice and learning in commercial environment – what I can pay back is hard work and give all the best.
